Cashless System Installation

for ReadyPop and ReadyServe One Cashless Enabled Units

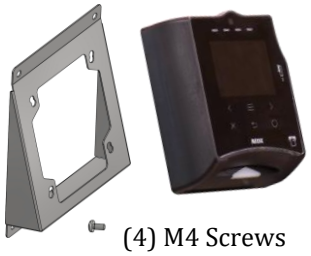

Installation to be perfomed by qualified service personnel only. Unit must be off, unplugged, and allowed to cool before starting installation.

This sheet shows how to install a Nayax Cashless Payment System (either a VPOS or ONYX Device) on a ReadyPop or ReadyServe One unit that is Cashless Enabled *(has provisions for adding a Nayax System).*

Cashless Enabled unit includes:
Instruction decal, bracket(s) and fasteners required to install a cashless module.

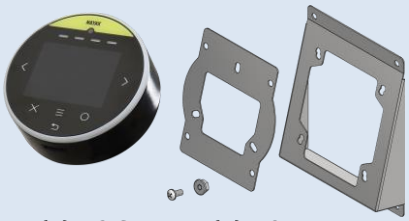

Parts and Installation for:

VPOS Module

(4) M4 Screws

ONYX Module

(4) #8 Screws; (4) #8 Nuts

Installation Instructions

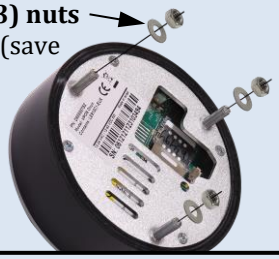

1. Remove parts indicated.

Remove (4) screws to remove molded bracket.

Discard screws, they are too long for the new metal bracket.

Remove (3) nuts /washers (save for reuse).

2. **Make sure** the device gasket stays in place.

Bracket gasket is not used (keep it with the bracket).

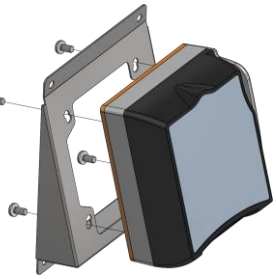

Device Gasket

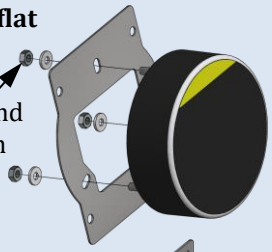

3. Attach module to angled bracket as shown.

A Use **(4) M4 screws** provided in kit.

A **Attach flat plate.**

Reuse nuts and washers from step 1.

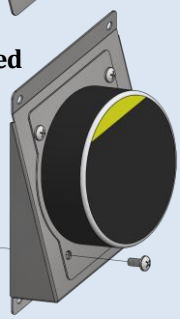

Remove plastic backplate from back of VPOS device (save for reuse).

B

B **Attach to angled bracket.**

Use **(4) #8 screws** and **(4) #8 Nuts** provided in kit.
