Storage & Shelf Life:

The current recommended shelf life for an unopened bag of raw popcorn is one year. This recommended shelf life is based on storage at 22C or 71F and approximately 50-70 percent relative humidity. The 50-pound bag must remain intact and undamaged. Holes, rips, tears or opened seals will shorten the shelf life. The storage area must also be free of insects and pests. Their presence could shorten the shelf life and decrease the quality of the popcorn. Significant deviations from these conditions will shorten the shelf life.
